## GEO HORIZONTAL

The stone comfort zone with  
a Low-H<sub>2</sub>O heat exchanger

Geo is a warm rock, made out of granulated natural stone: a composition of mineral materials. The cosy warmth of a tiled stove in a modern design. The horizontal version combines the warm natural stone granulate with revolutionary Low-H<sub>2</sub>O technology. The combination of classic design with mineral materials and Low-H<sub>2</sub>O technology makes this radiator into a unique product: form and function in perfect harmony.

Also available as vertical version.  
See page 235.
