

QUATRO CANAL

Super-powered climate control for 4-pipe systems

Heating, cooling, ventilation.

Despite its compact dimensions, the Quatro Canal is a powerful main heating system, cooling unit and ventilation system, all in one. Quatro Canal provides the highest possible climate comfort quietly powerfully, and unobtrusively.

Compact and silent

The high-tech dynamic 4-pipe heat exchanger and the thermal activator provide an effortless transition from heating to cooling or vice versa. They have been designed to deliver a very high heat output and are perfect to provide effective cooling with dry as well as wet cooling systems.

Using the latest EC motors enables Quatro Canals to consume up to 50% less electrical energy than traditional motors, and enables remote control using the latest home automation and building management systems.

Suitable for non-condensing and condensing cooling with chilled water
